## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 12, 13 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Issachar.

There is disclosed in Issachar an emitter (LED) for emitting a signal, a detector 58, 58' for detecting the signal, a reflector 55, 62, 63, 64 for relaying the emitted signal from the emitter to the detector, and an actuator 36, 55', 62', 63', 64' for selectively positioning the reflector, all in association with an operating base 204, a working bowl 200 and a lid 203 of an appliance. In regards to the device being recited as an interlock, there is nothing in the claims which would structurally define any type of locking mechanism.

### ***Allowable Subject Matter***

Claims 6-11, 14-16 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Art Unit: 1761
